

Saunders Archery

All Products Proudly 

Points

Combo™ Low Drag & Matt Wear

Combo Points™ endorsed by 3-D and foam target manufacturers. Patented form reduces matt wear and aerodynamic drag. **12 pk**

Field/Bullet/Target Old Favorites

Precision machined and richly finished...just what you expect from Saunders. **12 pk**

Glue-On Blunt & Field Traditional

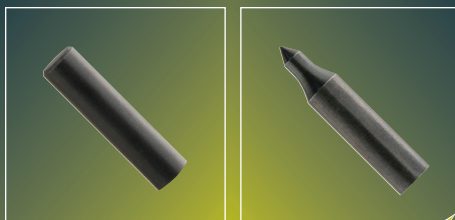

Quality points for the traditional archers. **12 pk**

Broadhead Adaptors Adapt Traditional Blades

A precision adaptor for the traditionalist archer. **12 pk**

Bludgeons™ Small Game Getters

Special energy-transference head packs a wallop, eliminates broken shafts and snaking under grass. Screw-in and slip-on models.

Combo-Bulge™ Easy-In Easy-Out

The Combo-bulge is easy on matts and easy to draw the arrow out. **12 pk**

Combo™ Glue-In Tournament Essentials

Same Combo™ style but on a glue-in nib design. Custom sizes available. Stainless.

Deadening & Balance Tuning

Bow deadening... where it all began.

In 1985, Saunders revolutionized archery by introducing the first shock deadening stabilizer...the Torque Tamer™. Since then we have made hundreds of improvements but none match the dramatic leap embodied in today's new systems. Unmatched in shock and vibration suppression, with weight, balance and angle adjustment, plus a new, quiet, no-luster stealthy material... undetectable by deer radar. Besides soaking up light and sound this material reduces weight and sports a new super dull finish.

We invite you to join us in our pursuit of the ultimate shooting and deadening control systems. Give them a close look, compare them to all others, and then give them the ultimate test...your bow.

Shock-Tamer™ The Deadliest Deadener

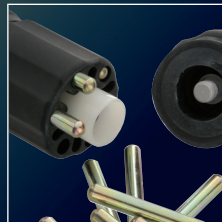

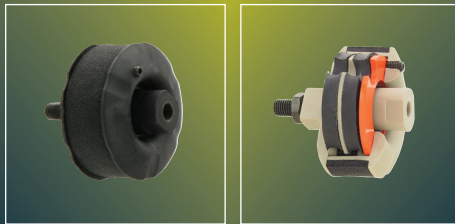

Forget what you thought was the best deadening system. Crank this baby on and you have added more deadening power than NORAD has in the center of Cheyenne mountain. The Shock-Tamer is a radical departure. Two Internal chambers form a death trap for shock and vibration by converting shock energy to heat. The forward attachment post floats independently surrounded by a patented visco-elastic polymer barrier. An alignment baffle, guarantees even the longest stabilizer will not sag. One shot and you will know, when it comes to shock dampening...there is no equal. Available in Black. #1370B

Energy entering the chamber, dissipates as heat. Alignment baffle knocks-out stabilizer sag (other systems are so

Stand-Off™ Stabilizer spacer.

The Stand-Off is a one inch aluminum spacer used for clearance on some reflex risers or between dampening components.

#1379 Black Only

Tamer-SS™ Modular Dynamic Stabilizer

Like the six shot revolver that tamed the west the Tamer-SS comes loaded for action. Add up to six 151 grain slugs, boost dampening or weight from 3.76 to 5.84 ounces. Easy to load at home, or on the range so tuning is never a problem. The end-caps and cylinder are molded of a new quiet, no-luster shock absorbing resin. The cylinder floats on a core suspended in a visco-elastic polymer. All this technology traps noise and vibration on orbital, horizontal and vertical axis so effectively, you'll have to shoot it to believe it. So give it a try...you have nothing to lose but a bunch of loud and bad vibes. Available in Black. #1356B

Pro-Tamer™ Modular Dynamic Stabilizer

The Pro-Tamer is a power house. Two cylinders load up to twelve 151 grain slugs to boost dampening or weight from 5.36 to 9.5 ounces. You control how much and where the weight is ...forward or aft. The end-caps and cylinder are crafted from a new quiet no-luster, shock absorbing resin. The cylinders float on a core suspended in a visco-elastic polymer. Face any tuning problem with confidence, after all you have the power to kill noise and vibration and generate perfect balance with brute efficiency. Available in Black. #1360B

The balanced approach.

The best tunes are in harmony.

A perfectly balanced and dampened bow feels right and shoots accurate consistently. Now with Saunders Pro-Angler™ and our adjustable weight dampening systems, balanced tuning is no longer a chore. In fact, changing weights and or angles is literally a snap. Our stabilizers and dampeners are engineered for optimum performance at any angle... which is a good thing since the Pro-Angler™ knuckle is the world's easiest and most versatile. Try this balanced approach, you'll hear and feel what deadening is really all about. Smooth, deadly accurate and deadly quite... now that is a beautiful tune.

Pro-Bandit™ Big Shock Thief

The Pro-Bandit's twin no-luster, super-quiet caps encase a patented visco-elastic shock deadening polymer. A quick turn opens the bayonet-lock caps for adding up to six 1/8 oz weights to boosts dampening or weight from 1.64 to 2.39 ounce. Comes with 5/16-24 and 1/4-20 mounting screws. Add this 2 1/16" long thief to a short or long target stabilizer or to the back or sides of a riser...you'll be surprised how much shock it steals away.

#1337B Black

Bandit™ Little shock Thief

Like its big brother this little thief is out to steal shock and vibration. But at only 1 5/8" height it tends to hide-out in tight places. Made from our stealthy no-luster, super-quiet material and equipped with a bayonet-lock system, the Bandit opens for adding up to six 1/8 oz weights to boosts dampening or weight from 1.03 to 1.78 ounce. Comes with 5/16-24 and 1/4-20 mounting screws. Good things do come in small packages.

Pat Pending

#1336B Black

Pro-Angler™ Best Knuckle...guaranteed!

The Pro-Angler is loaded with features. Angle the stabilizer to counter thrust, for storage or to offset the weight of a bow quiver. Its 325 settings lock-in precisely, and coming back to your favorite spot is fast-n-easy. It is 2 inches long, durable, quiet and bayonet coupling makes removal and attachment fast and fun.

Pat Pending

#1381B Black

"The new Tamer SS and Pro Angler are great! The knuckle doesn't just have the easiest quick detach, it lets me angle my stabilizer any direction and lock it into that position. Great idea.

Sliding the weights into the revolver-like chamber of the Tamer SS made it fun to set up, another great idea. The soft-texture material and finish are perfect, what bowhunters have dreamed of. Normally I spray a coat of dull paint on any new bowhunting gear, but I didn't have to... it has no shine. Now I have a stabilizer that looks as good as it works. Keep up the good work."

Ray Castille , LA

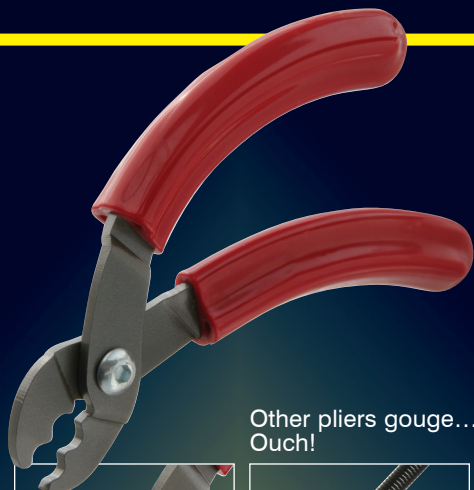

String Things

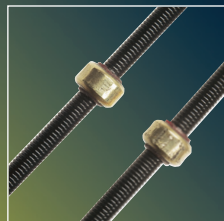

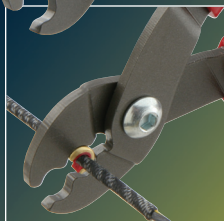

Nok Set® Pliers Designed To Be The Best

Saunders invented the Nok Set® and nocking pliers in 1964. Since then we have made several styles but none match the performance and comfort of our new pliers. Air cushioned grips conform to your hand. The self opening jaws are non-marring and just the right width to see alignment during closing. A new tip opens Nok Set in one easy squeeze. Each pliers comes with 12 Nok Sets..

#3028 Powder coat finish

Other pliers gouge...
Ouch!

Tip Guard Bow Tip Protector

A tough durable guard that conforms to and protects the bow tip. Secures bow string loop. Contains no damaging elastomers. Stays soft and pliable.

#0408

Kiss-XL Soft Large Slotted Kisser

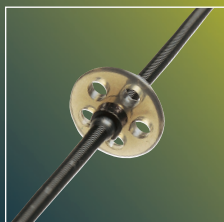

Kiss-XL Precision anchor even with face mask. Soft comfortable rounded edge. Weight 14 grains, 17mm OD, slotted for easy over string installation. Positioning rings included. #2408 For 16-18 Strand

Kiss-X Soft Slotted Kisser

Kiss-X soft 1/2" (13mm) OD. Soft with smooth rounded edge for a comfort. Durable, weight 11 grains, slotted for easy over string installation. Positioning rings included.

#2403 For 12-14 Strand

#2404 For 16-18 Strand

Nok Sets® The worlds leading nocking device!

The world's most popular arrow-to-string indexing device. Light weight, rounded brass with protective inner liner keeps arrow-to-string position consistent. Six to a card.

#3000 Purple for 20-22 strand

#3001 Red for 16-18 strand

#3002 Black for 12-14 strand

#3003 Blue for 8-10 strand

Brass Positioning Rings Crimping rings

Black zinc plated rings to help secure string accessories. Always use correct size & close with Saunders Nok Set Pliers.

#3050 Medium Rings (bag of 50)

#3060 Large Rings (bag of 50)

Brush Offs™ Lightweight Deflectors

Keep weeds and twigs out of string grooves. Helps prevent twisted limbs and accidental unstringing. Exclusive ribbed design and soft sound absorbing material keeps weight and dampens sound. A must on recurve, traditional and Oneida Eagle bows.

#1445 Twin pk

No-Twist™ Recurve Bow Stringer

Eliminate twisting of limbs while stringing bow. Top limb gripper fits below string loop allowing full, easy access to upper limb. Non-marring gripper will not damage limbs. Tough, nylon braid can be used on bows up to 70 lbs. Always use safety glasses when stringing a bow.

#1418

Tuning Aids

Firing-Line™ Release Checker & Training Aid

Firing-Line™ is the ultimate training tool. It stows in a brief case...perfect for practicing anywhere, anytime. With quick draw-length adjustment and three draw weights it's perfect for warming up, tuning a release or muscles. Even better, it helps overcome everyone's nemesis...target panic. Never worry about throwing an arrow... just aim and practice the perfect release. With each smooth and quiet shot you burn-in muscle memory so when punching paper, you burn-in the x-ring. And with the new optional weight set its even better. Clip on three pounds of weight... for the feel of a real bow. Firing-Line™ ...The place you win.

(S) Standard draw is 25-28#, (L) Light is 10-12# and (H) Heavy is 35-37#. Please specify draw weight.

- #1155 Firing-Line™
- #1156 Firing-Line™ for finger shooters
- #1157 3 lb weight option

Power Pull™ Upper Body Conditioner

Don't wait till the hunting or tournament season to get in shape. Build stronger back, arms and chest muscles in the first week. Pull one band high reps for improving muscle tone or two bands to increase muscle mass (two bands pull about 70# at 31"). Weights make the unit comparable to your fully equipped bow. Easy to take on a trip or to use to relax at work. Recommended by rehab specialist.

- #1154 Power Pull w/weights.
- #1150 Power Pull (no weights)
- #1153 Replacement Bands
- #1151 12 oz weights
- #1152 24 oz weights

Forked Horn™ Swing Gauge Bow Square

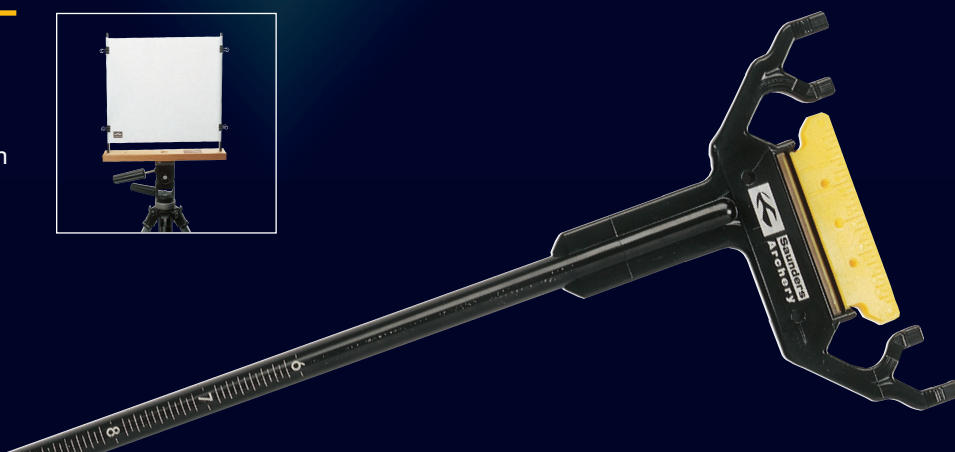

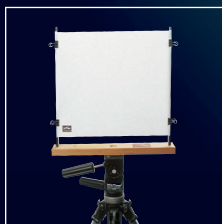

The Forked Horn positions Nok Sets® accurately. Marked gauge swings away to crimp the Nok Set® with the square still on the string. 5/16" Rod centers perfectly on arrow rest. Ideal for shoot through rest. Offset allows use with kisser. Gauge is a bright, fluorescent color. Pat NO 4382339

#0428

Paper Tuner Compact Bow Tuning System

The best way to tune a bow is by checking how true the arrow flies. The Paper Tuner makes it easy and inexpensive to check arrow flight. The compact 11"x14" finished oak frame can be clamped or mounts onto a tripod in seconds. Unit includes a 17" x 17" four color target and easy to follow instructions.

#1142

Essential Gear

...“I have used the Diamond Defender for years. No matter which hunting jacket I grab, the open design of the armguard seems to disappear, especially with the new swirl camo color.”

Ray Castille, LA

Diamond Defender™ Cool, Jacket-Holding, Scent-Free Arm Guard

Hunters understand leather armguards are scent magnets. Our Diamond Defender's 4" x 7-1/2" open design blends with camo jackets, is cool, comfortable, lightweight and will not absorb odors. It's durable, washable and wide to keep even a heavy jacket tucked in. Will not curl or crack. Hooks latch easily and quietly. Adjustable straps. Choice of the serious hunter.

- #1700 Black
- #1700X Camo

Clear View Peep™ Wide Angle Peep

Enjoy an unobstructed view with no hood to limit vision. Constructed of non-glare high-strength polymer. This is the perfect peep for hunters, 3-D shooters, and field archers. 1/8" aperture, 1/2" diameter.

#0270

EXPREST™ For Those Who Believe in K.I.S.S.

EXPREST™ keeps it simple. It is the only tape mounted, twin arm rest to hold from the smallest carbon to the largest aluminum arrow with no gaps. Eliminates need to hold arrow by hand or the use of an arrow holder. Draws quietly and smoothly without skip. Patented arms fold down-and-away for a clean, accurate launch. Works on right and left handed bows and is great for bowfishing too. Patent No 4380226
#0300

On-Guard™ Now in brilliant colors

Clean, open design is cool, comfortable and at home on the line or on the range. Will not curl or crack. Quick-hook adjustable elastic. Available in Black, Blue (B), White (W), Green (G), Turquoise (T), Yellow (Y), Purple (P) and Camo (X).

- #1702 Black
- #1703 (Specify Color)

Kwik-Lok™ Composite Arrow Holder

Kwik-Lok's™ unique composite of soft plastic and spring steel holds the arrow firmly, yet swings away quickly, smoothly, quietly, even under the coldest conditions. Now the pressure button mount also adapts to fang style shoot through rests.

Carbon arrow adapter rings included.

- #2508 Tape Mounted
- #2518 Pressure Button or Shoot Through
- #2548 Shoot Through Only

Tabs

Pak-Tab™/Fab-Tab II™ / Mono Tab™

Pak-Tab allows you to switch layers to match shooting conditions. The "super slick" outer tab and soft cushion layer will not absorb moisture or scent. Add the felt layer when more cushion is needed. Assemble the layers that meet your needs. Can be used with or without finger spacer and is reversible for right or left hand. Custom brass fasteners make changing layers easy. Or choose the convenience of the preassembled Fab Tab II with one layer of felt between two layers of super slick plastic, with finger spacer or go for the simplicity of the single layer Mono Tab. Specify size (S,M or L)

- #0900 Pak-Tab
- #0920 Fab Tab II
- #0824 Mono Tab

3-Under Tabs

The Best Three Under Style Tabs

Our famous super slick tab made for three-under style shooters. One layer of felt between two layers of super slick plastic. Specify size. (S,M or L)
#0930

Finger Guard™

For no glove shooting.

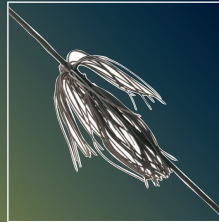

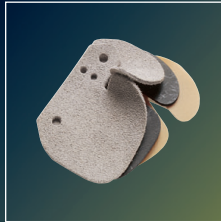

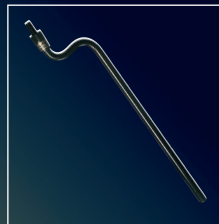

Soft waterproof material makes Finger Guard perfect for bowfishing. Cushioned sleeves slip over bowstring and anchor with Nok Sets® (included) Provides smooth release, consistent nocking point and finger protection. For use on strings up to 16-strand.
#1720

Deep-Six™

Fish Arrow

The Deep-Six high density solid fiberglass fish arrow comes complete with the Saunders Kwik Nock System for snap on nock replacement, tough lay fletch for arrow guidance and two part head with swivel barbs to keep the head from unscrewing yet detachable for easy fish removal.

- #1238 Deep-Six Fish Arrow
- #1203 Replacement Point

Z-Rod™

Cable-Guard Rod

The Z-Rod's tight bends provide extra cable travel and its 16 micro finish makes it ideal for any slide. Pat No. 4377152
#1802

Whisper Whiskers™

String Silencer

Durable, water proof rubber whiskers dampen and quiet string without balling-up, collecting leaves or burrs.
#0703 Black Two pair

String-Shield™

Bowstring Wax

Extends string life and screens UV rays. Odorless, water repellent custom micro-lub formula keeps fast flight & Dacron strings fast and accurate.
#1428

Vu-Lube™

String/Rail/Tab Lubricant

Formulated for the VUDU™ dampener. Vu-Lube™ is a super slick all temps blend, odor-free, waterproof and will not attract dust... The Ultra Slick Stick!
#1426

Finger-Sling

A Simple Comfortable Sling

The lightweight, comfortable and a simple way to secure your bow. Ideal for loose grip shooting style. Specify size. (S,M or L)
#0405

Zip Reel™

Bowfishing reel

The Zip Reel's 6-1/2" open design features fast runoff, wind-up and line dry. Engineering grade plastic body. Comes with fifty feet of line. Specify left or right hand model. #1212

Braided Fish Line

Two-hundred Pound Test

Twelve strand 200lb test nylon line. Tough durable and long lasting.
#1210 50 feet braided nylon

Braided Fish Line

Two-hundred Pound Test

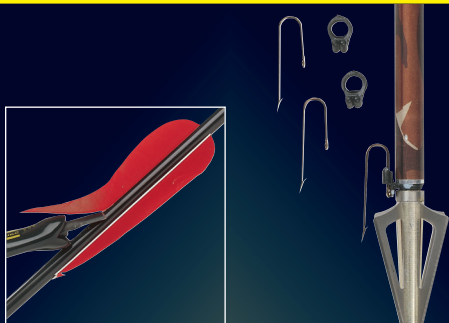

Twelve strand 200lb test nylon line. Tough durable and long lasting.

#1210 50 feet braided nylon

The Stripper™ Fletching and Glue Remover

Removes fletching in one easy stroke. Cover keeps reversible curved blade sharp when stored. The Pro-Stripper has all this plus a large handle to cut big jobs down to size.

- #1145 Pro-Stripper
- #1141 The-Stripper
- #1146 Blades 3 pk

O-Ring Locks™ Broadhead Alignment Rings

Slips onto the shoulder of screw-in points to help prevent loosening and allow alignment.

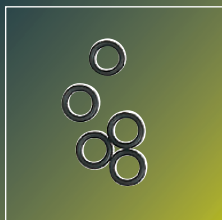

- #0000 100 pk

Pro Grip™ Arrow Gripper

This special soft-n-tough tube makes arrow removal fast easy and economical.

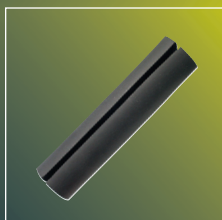

- #0617 Twin pack

Quiet Cushion™ Sound Absorbing Foam

Peel-n-stick cushion attaches to bow shelf to eliminate arrow slap and noise. Soft, waterproof and easily contoured for a perfect fit.

#0705

Hunt-Bond™ Hot Melt Cement

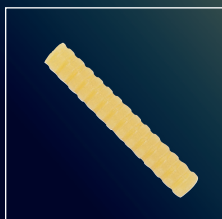

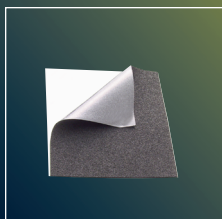

Hunt-Bond's low melting point, holds inserts and points to aluminum, wood or carbon shafts even in extreme cold when other hot melts become brittle. Over 30 formulations were researched to attain the Hunt-Bond quality.

#1168

Arrow Mate™

Considered the best and most advanced nock and vane cement in the archery industry today. Arrow Mate, an all purpose adhesive for household and shop use, works well in damp or freezing conditions.

- #1117 NPV Cement 1oz Tube

Tracker Tags Works with all line trackers!

Line barb attaches to collar until impact secures line. Weighs only 7 grains. Makes tracking positive even with a pass through shot.

- #0470 3 pk

Blade Gripper™ Broadhead Tool

Regular tools protect fingers but only the Blade Gripper's patented interference fit grips the blades for positioning and easy assembly.

#0608

Point Puller™ Fits ATA Standard Threads

Machined from carbon alloy steel, plated and finished with foam handles.

Compact, durable and makes extracting broadheads and points a cinch.

#0610

Grip Tite™ Arrow Pulling Pad

Flexible super grip material makes arrow removal easier. Attached wrist strap conveniently keeps it ready for use.

#0614

2-Bond-2™ Super High Bond Tape

This super high bond double sided tape is ideal for many uses.

#1108

Carbon Mate™ Super Strength Two Part Epoxy

This two part epoxy sets in one hour and is fully cured in sixteen. Carbon Mate gives you the ultimate in adhesion on carbon, aluminum, or wood shafts.

#1160

Five Minute Epoxy High Strength Two Part Epoxy

Get a high strength bond in five minutes. Use on carbon, aluminum, wood or glass. Holds even underwater... excellent for bowfishing.

#1158

Matts, Stands & Faces

Indian Cord Matts

Archery at its traditional best.

The Saunders Indian Cord Matt is machine wound of a tough, durable prairie grass known as Indian Cord from our own meadow. Each matt is individually wound, covered with resilient natural burlap and hand sewn by skilled craftsmen. Archers not only use the matt because of its longevity, economy and traditional appeal, they also use it as a great bow tuning aid. The Indian Cord Matt holds the arrow at its flight angle, revealing how well the bow is tuned. And it's even more revealing when done with fletchless arrows. Whether shooting classic or compound, wood or aluminum arrows, you'll enjoy shooting into this beautiful tradition of archery.

- #1625 25" Indian Cord Matt
- #1630 30" Indian Cord Matt
- #1636 36" Indian Cord Matt
- #1650 48" Indian Cord Matt

Matt Stands

Support The Best

Easel stand flattens for transport and storage. They are great to take along camping or for backyard shooting. Its optional support holds a second matt for up to 10 times greater matt life. Wheeled Matt Stands make set up for an individual or a practice range fast and easy. Hardware Stand Kit lets you make your own sturdy matt stand easily. Kit includes wheels, matt brackets, tripod mounting plates, backup matt support hardware, fasteners and illustrated instructions. You provide the 2"x4" lumber, a drill and wrench and you're in business.

- #1670 Hardware Kit for 36"-48"
- #1604 Wheeled Stand for 36"-48"
- #1602A Easel Stand for 25"-36" Matt
- #1692 Back up Option for #1602A

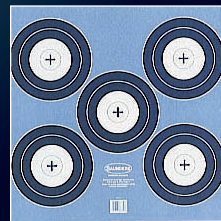

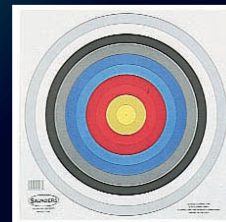

Target Faces

The **Toughenized Face** was developed by Saunders, it contains hundreds of nylon threads criss-crossing between two layers of heavy stock, tripling target life. Available as square or in the new wider skirting which also fits competition matts.

- #1580 Four Color Skirted Toughenized
- #1585 Four Color Toughenized Square
- #1571 Replacement 4-Color Spot for:
- #1581 Four Color Skirted Toughenized
- #1582 Four Color Skirted Toughenized
- #1587 Four Color Toughenized Square
- #1583 Four Color Skirted Toughenized
- #1588 Four Color Toughenized Square
- #1572 Replacement Spot 4-Color for:

- 48" (122cm) Fits 48" Matt
- 48" (122cm) Fits 48" Matt
- (122cm) Tag Paper (Not Shown)
- (80 cm) Fits 36" Matt
- (80 cm) Fits 30" Matt
- 30" (80cm) Fits 30" Matt
- 24" (60cm) Fits 24" Matt
- 24" (60cm) Fits 24" Matt
- (40cm) Tag Paper (Not Shown)

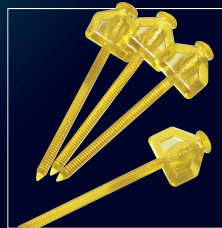

100# Tag Stock Faces are higher in quality and more durable than lighter weight faces. This is especially important as groups tighten.

- #1573 Four Color 10 Ring (80cm, 30"), Tag 32"x 32"
- #1574 Four Color 10 Ring (122cm, 48"), Tag 50"x 50"
- #1575 Four Color 10 Ring (36"), 100# Tag 38"x 38"
- #1576 Four Color 10 Ring (60cm, 24"), Tag 26"x 26"
- #1577 Four Color 10 Ring (40cm, 16"), Tag 17"x 17"
- #1579 4-Color 10 Ring Light Wt. Shaded (16"), 17"x 17"
- #1541 Blue & White Dual (40 cm & 5 Spot) 17"x 17"
- #1549 Replacement Spot for 40 cm Blue/White 7"x 7"

Sure-Lok Face Pins

Press the durable, rust proof Sure-Lok Face Pins in and give them a quarter turn—your target face is locked on tight. Reverse a quarter turn and they pull out easily.

- #1618 4pk

Saco™ Targets

Saco™ and Saco-2™ are exciting new archery and slingshot swing-paddle targets. Games are shot against the clock or have shot limits, both of which build excitement. Individual or team competitions are fast, action packed and fun to shoot. Being a spectator is fun too. Watch as the drama unfolds, shooters pull ahead, fight to recover or fold under pressure. Don't want the pressure?... shoot solo to relieve tension, hone skills or just to enjoy the sounds and action of impact. Its contagious for all ages, skill levels and for shooters and spectators alike. Have fun — shoot safe — enjoy!

Tough, durable and virtually maintenance free!

Construction Commercial Grade Materials

Saco™ targets are made to take a beating. Tough tubular frame, buttressed end caps, stainless clamps and polyurethane paddles make for a beautifully strong and durable unit.

Replacement Parts Plug-n-Shoot No Tools Necessary

Though rarely needed, replacement paddles and shield are available.

- #4003 Paddles (Specify Yellow or Black)
- #3985 Shield (Black)

Easy change
paddles slip into
slotted receiver.

Saco™ Swing-Paddle Target

Complete target. Some assembly required. Arrows and Bludgeons™ not included. Patent No. 7,690,656,B2

- #1676 Saco™ Six paddle
- #1677 Saco-2™ Twin paddle

Saco Bludgeons™ Official Blunts For Saco™ Use

These blunts help the champ take the punches. Two 100 grain slip-on sizes for 11/32 and 9/32 shafts and a 145 grain screw-in style.

- #5740, 5742 & #5748
