

**Falcon-2™**  
Tournament Grade Wrist-Rocket®

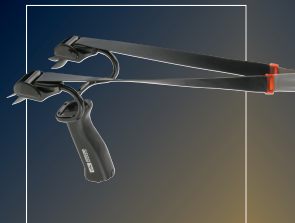

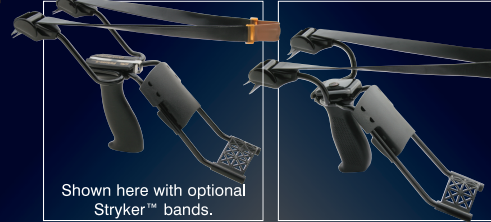

The Falcon-2 is a blend of comfort, power and accuracy. With its large handle and reach, this take-down model is popular the world over.

#2012 Patent No. 7827977 & 8087404B2

**Hawk™**  
The Non-Braced Alternative

The Hawk is compact and fun to shoot but don't let its size mislead you. The Hawk™ packs a fast, accurate and powerful punch.

#2020 Patent No. 7827977 & 8087404B2

**Double-Eagle™**  
Twin Folding Action Wrist-Rocket®

The Double-Eagle™ folds down to stow yet is remarkably steady. Its grip has been crafted to be comfortable in young or adult hands. Favored by plinkers & target shooters alike.

#2045 Patent No. 7827977 & 8087404B2

**The Classics**

Today's tubular Wrist-Rockets® descend from the proud heritage of our first models in the '50s. Built from tough steel frames and engineering grade plastics they are great for plinking or if you like the heft of a strong pull. Both models shoot from 25-56 Cal ammo.

**Folding Falcon™**  
Compact & Durable

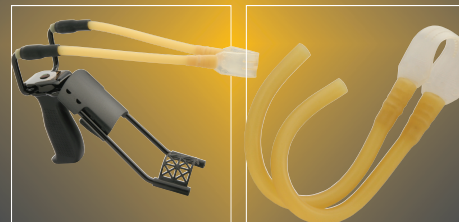

The Folding Falcon™ has a new ergonomic brace and protective guard. Folds for storage. Nylon prong-caps, band sleeves and polyurethane pouch.

#2022

**SR7™**  
Classic Tubular Wrist-Rocket®

Molded handle, polyurethane pouch and nylon prong caps to extend band life.

#2002

**Matched Tubular Bands**  
For Classic Wrist-Rockets® Only

Never use tubular bands on flatband models. Comes in new tube package for natural straight alignment.

#2008 Bands Tubular High Power

**Classic Ammo**  
For Classic Wrist-Rockets® Only

For use on classic tubular band models only. For flatband models shoot 50-Cal steel or 56-Cal glass ammo listed above.

- #2014A Steel 25-Cal 334 pc. clam
- #2014A1 Steel 25-Cal 850 pc. dispenser
- #2014A2 Steel 25-Cal 2125 pc. dispenser
- #2017A Steel 38-Cal 100 pc. clam
- #2017A1 Steel 38-Cal 245 pc. dispenser
- #2017A2 Steel 38-Cal 600 pc. dispenser

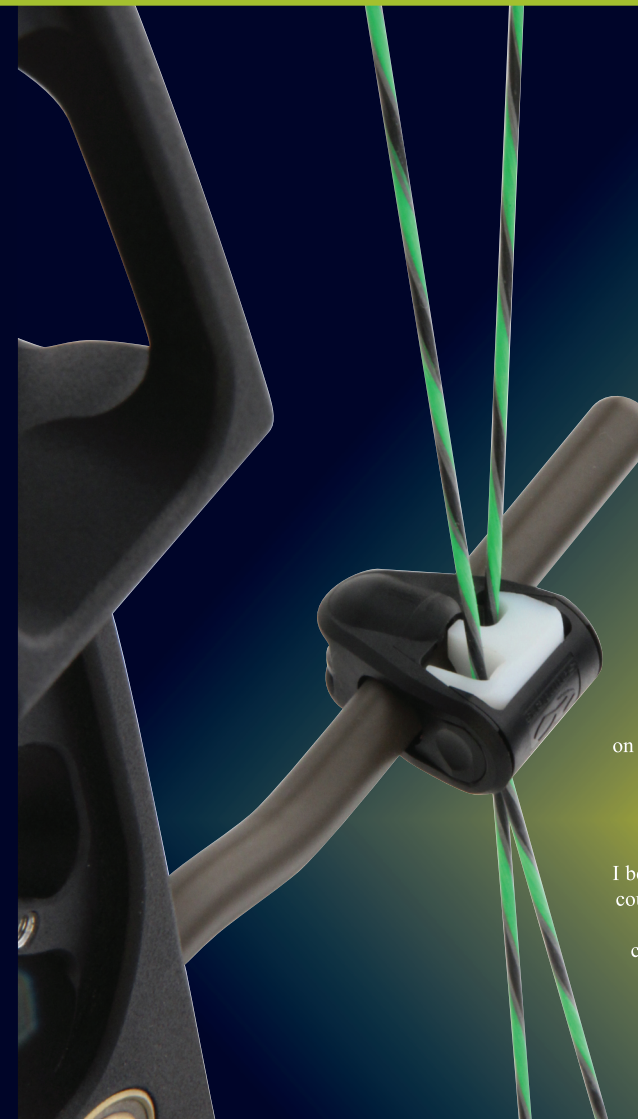

**Choosing Wrist-Rockets®**

Each model has pros and cons. Speed depends on the draw length and band type. Flatband models are fastest and their power can be adjusted. The Pro™ has the longest draw length, is the fastest but takes practice to be on form. The Falcon-X™ and Falcon-2 are the second fastest with The Falcon-X™ winning in comfort and accuracy. The third fastest is the Double-Eagle. The new Wing™ and Hawk™ have the shortest draw, yet can shoot faster than tubular models. Of the two the Wing™ takes first place in accuracy, comfort and convenience. Tubular bands are slower than flatbands but excel in durability.

**Choosing Ammo**

The Flatband pouch is made to shoot only 50-56 Cal rounds. Our 50-Cal steel are precision ground and by far the most accurate. The economical 56-Cal glass shoot faster but less accurately than steel. They come in pearl — Red, Black, Yellow and White. The 56 caliber 1500 piece box use manufacturer's end-of-run colors and vary pack to pack. Tubular™ models shoot from 25-Cal to 50-Cal steel and 56 caliber glass ammo. Note: Dispenser tubes are reusable... find them a home in your shop or garage.

**Hyper-Glide**

**Hyper-Glide™**  
Underslung Cable Slide

Hyper-Glide™ sports a sound-free silicone ringed wheel and a supremely slick sinter-forged cradle to unleash wicked power quickly, quietly, and effortlessly. Hyper-Glide™ magic...

snap on wizardry in cable slide perfection. Fits 3/8" rod.

#1819 Patent No. 5983880

"I installed Hyper Glides on my Elite Victory 37 and Energy 35, adjusting the bars to give vane clearance. The slides went on easily and work great. They are smooth and generate no chatter. I believe it made the bow quieter and I could detect a slightly smoother draw. Thanks for being an American company and providing such great support!"

Steven S

"...I purchased a Hyper Glide for my Elite bow, it works awesome and added 9 fps to my bow which I know people said it could but i didnt believe it until I tried it. Great product, really satisfied."

Dustin S

"...I am a predator hunter so silence is a must for me. I have a PSE Stinger and purchased the Hyper Glide and VUDU great products made such a difference."

Dean B Australia

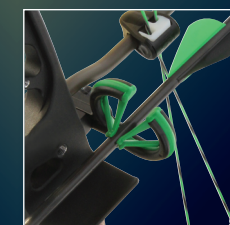

**Under Development**

**Innovating... Great Products For A Great Sport**

Developing new products is our passion and we would like to share some of the neat stuff under development. We are forging ahead innovating archery and Wrist-Rocket® products for beginners, enthusiasts and coaches.

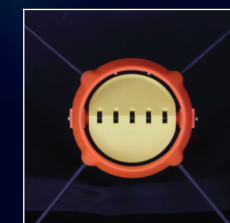

This is an exciting time for all of us at Saunders. We hope you will join us in our never ending search for shooting perfection. Send us your input and ideas or just stay in touch. We look forward to hearing from you.

Team Saunders

**Aero-Gate™**  
Self Centers Any Size Shaft

The Aero-gate™ arrow rest is under development. Designed to be simple and perform exception. The new rest self centers any size arrow and has interchangeable gates for regular arrows or heavy fish arrows.

**Wrist-Rocket® Target**  
Folds For Transport

A revolutionary target for slingshot enthusiast. The spinner bullseye can also hold clay pigeons for a shattering experience. The target traps ammo and looks great in a recroom, range or in the field. Quickly folds for transport or storage.
